PRODUCT | RANGE

Stylishly Simple

Introduction

At Access Hardware we aim to provide quality products at an affordable price. The stainless steel products in this range are designed for use with glass cubicles.

Material

All products in this range are satin stainless steel finish

SSS 316 – A higher grade of stainless steel for improved corrosion resistance

SSS Permalast – A special coating to improve the corrosion resistance of the Stainless Steel Material

Guarantee

Access Hardware guarantees their products against defects in workmanship and materials subject to fair wear and tear in standard atmospheric conditions for a period of 10 years.

Access Hardware assumes no liability for:

- Improper installation or failure to follow fitting instructions.
- Improper maintenance or unfair wear and tear.
- Indirect or consequential loss or damage.
- Cost of removal and/or replacement.
- Cost of freight and/or travelling expenses.

Although our stainless steel products are suitable for most applications, neither grade 316 or permalast is unconditionally guaranteed and advice should be sought from one of our representatives.

Care and Maintenance

To retain the highest corrosion resistance it is necessary to keep the surface of stainless steel clean. This can be done by wiping with a warm clean cloth using either a mild detergent or soap, then rinsing with warm clean water and drying with a towel. Carbon steel brushes or wire wool should not be used. Comprehensive instructions are available upon request.

Change of product specification

As a result of continuous improvements to our products, we reserve the right to alter standard product specifications and dimensions without prior notice.
